

# Reading derived words by children with and without dyslexia

**Cristina Burani**

Istituto di Scienze e Tecnologie della Cognizione, CNR, Roma  
Dipartimento di Scienze della Vita, Università di Trieste

**January, 21 2019, 14:00 - 16:00**

Co-working Room of Dept. of Foreign Languages and Literatures  
(*Lingue* Building, room M.12)

**STUDENTI E DOCENTI SONO CORDIALMENTE INVITATI**

The conference will provide students with an overview of psycholinguistic research on the development of literacy skills in children with and without dyslexia. The reading of morphologically complex words in Italian will be specifically focused and compared with what has been observed for other languages. Students will acquire familiarity with the experimental paradigms used to investigate reading skills; theoretical and technical aspects will be presented and discussed.

**Iniziativa proposta da**

Corso di Dottorato in Letterature Straniere, Lingue e Linguistica  
In collaborazione con LaTeC – Laboratorio del Dipartimento Culture e Civiltà
